

RES Wins General Industry Service Award at 2013 Northeast Oil and Gas Awards

March 24, 2014 03:10 PM Eastern Daylight Time

HOUSTON--([BUSINESS WIRE](#))--Resource Environmental Solutions is pleased to announce receipt of the General Industry Service Award at the 2013 Northeast Oil and Gas Awards, held last week in Pittsburgh, PA. This award recognizes the outstanding achievements of those supplying and supporting the upstream and midstream sectors of the Oil and Gas industry, specifically rewarding success and commitments to health & safety, environmental stewardship and corporate social responsibility.

“We dedicated resources early to enable delivery of the first commercial mitigation solutions for the Pennsylvania Marcellus Shale. RES is proud to be recognized by our clients for our perseverance working with multiple, approving state and federal agencies to enable supply of offsets for project developers across the Commonwealth.”

RES received this award for its role maintaining the delicate balance of economic development and environmental stewardship. Development of the Marcellus Shale play requires numerous environmental permits from regulatory agencies. Key components of permit approvals are the mitigation solutions that demonstrate the ecological restoration activities used to offset unavoidable impacts from construction projects. Elliott Bouillion, RES CEO noted, “We dedicated resources early to enable delivery of the first commercial mitigation solutions for the Pennsylvania Marcellus Shale. RES is proud to be recognized by our clients for our perseverance working with multiple, approving state and federal agencies to enable supply of offsets for project developers across the Commonwealth.”

About RES

RES develops and supplies ecological offsets to help companies obtain required permits for unavoidable project-related impacts to wetlands, streams and habitats. Learn more about RES www.res.us. For additional information, please contact Russ Krauss at russ@res.us or 713.986.9222.
