

Abandoned Mine Land Reclamation

RES provides nature-based, turnkey solutions for a wide range of environmental challenges faced by local and global mining firms.

Flambeau Mine Copper Mine Reclamation
Wisconsin

We adopt a landscape-oriented approach, applying ecological principles from permitting to post-closure compliance monitoring. Our integrated, multidisciplinary team helps you build strong relationships with regulatory agencies, local communities, and the public.

Our expertise in ecology allows us to carefully match native vegetation to specific sites and regions, even establishing site-specific native nurseries when necessary. We excel in reclamation, designing and installing closure landscapes that not only meet but exceed requirements. Post-closure, our projects enhance the property's marketability for sale, donation, or repurposing. We address all phases of mining operations with a steadfast focus on safeguarding assets and natural resources.

Working with RES

- **Extensive Experience and Expertise:** Our team has unmatched experience and technical proficiency in AML Reclamation, ensuring sustainable, environmentally responsible solutions via full delivery projects.
- **Government Collaboration:** We have strong partnerships with PA Game Commission and PA DCNR, enabling a programmatic approach to AML Reclamation, which aligns with local and state environmental goals.
- **Risk Management:** We specialize in transferring risk and liability away from clients, safeguarding your investment and reputation throughout the project's lifecycle.
- **Innovative Financing:** We offer creative financing and procurement solutions, securing grants, incentives, and partnerships to make your AML Reclamation project cost-effective while meeting the highest environmental standards.

Seneca Meadows Wetland Restoration - Design-Build Mitigation for Landfill Impacts to Wetlands
New York
